

# Identify Your Cyber, Security & Privacy Risks

## Start With This Simple Assessment

*Getting on the path to cyber security means taking a hard look at your operations, and those of your vendors and suppliers. Take this quick self-assessment, and learn where your potential gaps lie.*

	Yes or No	
1 Do you store personally identifiable information in your network?	Y	N
2 Do you transmit personally identifiable information to third parties?	Y	N
3 Do any third party individuals or organizations have access to your clients' networks?	Y	N
4 Do you have laptops or other portable devices in your networks? Do your employees travel with laptops?	Y	N
5 Does your industry or state establish regulations regarding the security of confidential information?	Y	N
6 Does your company utilize automated responses regarding billing, notifications, etc.?	Y	N
7 Do you have wireless networks?	Y	N
8 Do you store backup tapes offsite?	Y	N
9 Are your employees able to email or download personally identifiable information from their workstations?	Y	N
10 Do you process credit card transactions?	Y	N

*Personally identifiable, confidential information is at risk in every industry. Let us help you find out what your potential financial exposure is and determine your data privacy and network security coverage gaps.*
