

Liability Coverage for Bio-Fuel Manufacturers

Tough risks, tough coverage.

As the search continues to find new, inexpensive and environmentally sustainable energy sources, bio-fuels have emerged as a potential answer. However, businesses that process or blend bio-fuels can be exposed to serious liability issues.

Risk Appetite

Risks manufacturing Bio-Fuel in quantities up to 100 million gallons annually

Coverages

- Commercial General Liability including Products/Completed Operations
- Time Element Pollution Liability Coverage for Premises/Operations and Products/Completed Operations
- Product Withdrawal Expense Coverage
- Occurrence or Claims-made Coverage Forms
- Defense in addition to limits except for Time Element Pollution Liability
- All coverage written on a single policy

Minimum premium: \$15,000
Eligible exposures: Bio-Fuel Manufacturers from any feedstock
Ineligible exposures: Oil and Gas Refineries

Limits

\$1 million per occurrence; up to \$2 million general aggregate; up to \$2 million products/completed options aggregate; up to \$100,000 product withdrawal expense coverage limit.

We have considerable experience with environmental coverage risks, and welcome the opportunity to discuss your client's needs. Call us or email us. The tougher the risk, the better.
